

Synthetic Patient Record

DEMO DATA - This fictional record is only for testing the RAG application. It does not contain real patient information and is not medical advice.

Patient	Anant Sharma	Record ID	DEMO-ANANT-001
Age	34 years	Visit date	18 September 2026
Diagnosis	Jaundice	Status	Stable; outpatient follow-up

Clinical Summary

Anant presented with yellowing of the eyes and skin, tiredness, and reduced appetite. The clinician recorded jaundice as the working diagnosis and advised follow-up while the underlying cause is evaluated.

Reported Symptoms

Yellow discoloration of the eyes, dark urine, fatigue, mild nausea, and reduced appetite. No confusion or severe abdominal pain was reported in this fictional visit.

Investigations

Liver function tests showed elevated bilirubin. An abdominal ultrasound and repeat liver function tests were requested for the follow-up visit.

Care Plan

Maintain hydration, rest, avoid alcohol, and take only clinician-approved medicines. Return for review in three days, or seek urgent care for worsening pain, repeated vomiting, bleeding, confusion, or increasing drowsiness.
